## ABOUT ME

I graduated as a civil engineer in 2017 and have six years of experience, but I decided to transition into the software industry.

Recently, I successfully completed Siliconmade Academy's backend-focused Full Stack software development program, where I built a solid foundation in key programming languages and frameworks such as C# and JavaScript. I am currently developing e-commerce, rent-a-car, and messaging applications. Eager to contribute to innovative software solutions, I am looking for opportunities to apply my skills in a dynamic environment, continue learning, and make a positive impact.

## EDUCATION

### Eskişehir Osmangazi University

2014 - 2017

Civil Engineering / Bachelor Degree

## EXPERIENCE

### Siliconmade Academy

Backend Development (16.03.2022 - 28.07.2024) **100/100**
